Compliance & Security Operations Maturity

# Fortinet in Alberta

## Calgary

Number of Employees: **40**

Sales – Account and Channel Managers, Marketing, Security Experts, and Specialists Teams, Technical Support, Professional Services, Software Development, Training

Number of Leadership: **6**

- Gordon Phillips - Vice President, Western Canada
- Scott Hay - Regional Director of Sales, Mid Enterprise, Western Canada
- Nahid Asani – Regional Director of Presale Security Experts, Western Canada
- Sean Weiss – Business Development Engineering Manager, Canada
- Kofi Ahulu, Manager of Presales Security Experts, Enterprise, Western Canada
- Genevieve Marcoux, Manager, Technical Training

**Top Cybersecurity company in**

Alberta and Canada

## Edmonton

Number of Employees: **14**

Sales – Account and Channel Managers, Security Experts, Specialist Teams, Training, Professional Services and Software Development

Number of Leadership: **2**

- Shane McMillian – Regional Director of Sales, Public Sector, Western Canada
- Stephen Estephan – Manager of Presales Security Experts, Public Sector, Western Canada

**2500 +**

Employees Canada Wide

**In Canada, Fortinet protects all types of organizations, including governments, major banks, telecommunications providers, healthcare organizations, and many others across**

sectors including natural resources, utilities, education, and manufacturing

## TOTAL

Number of Customers: **2520**

Number of Staff: **54**

Number of Leadership: **8**

# The Ever-Expanding External Threat Landscape

Phishing, DDoS

Unknown/Unmanaged digital assets

Rogue mobile apps

Fraudulent domains

Exposed services

Fake social media accounts

Leaked credentials

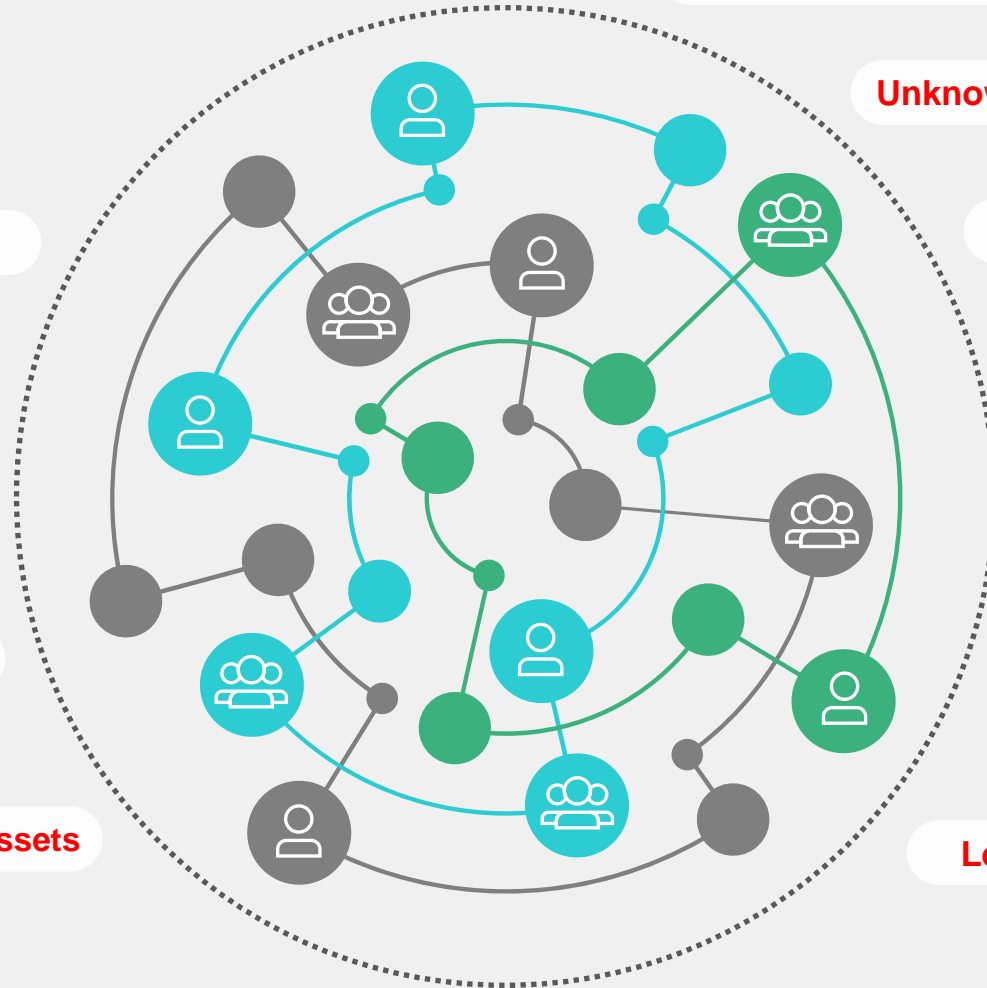

Vulnerabilities

Ransomware

Misconfigurations

Unsecured secrets

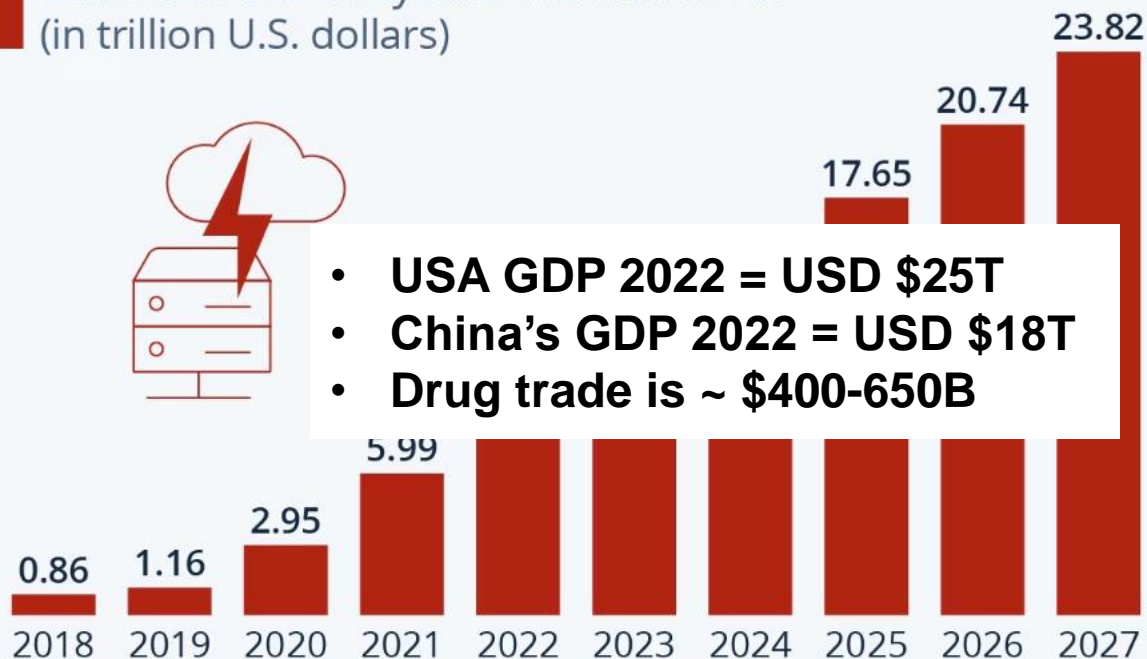

Third-party, publicly-exposed digital assets

# Cost of Cybercrime

## Cybercrime Expected To Skyrocket in the Coming Years

Estimated cost of cybercrime worldwide  
(in trillion U.S. dollars)

# \$9.44M

Average cost of a data breach in the United States

The annual cost of cybercrime to the global economy is estimated to have reached **€5.5 trillion** at the end of 2020.

- European Commission (2021)

# Challenge: Securing Operational Technology

Most industrial control systems lack security by design and are sensitive to change.

The attack surface for cyber-physical assets is expanding as a dependence on air-gap protection diminishes with Digital Transformation initiatives driving IT-OT network convergence.

Increasing adoption of new technologies, such as 5G, IoT, and Cloud.

Remote access requirements for third-parties and employees causing additional risks.

Asset owners' reliance on OEMs and SIs exposes critical systems to additional risks.

Asset owners must comply with industry-specific regulations

# Canadian Center for Cyber Security

On cybersecurity risks to OT

*[There is] an increase in use of malware that directly targets and disables OT.*

*Cybercriminals have developed OT-specific malware and state-sponsored actors have demonstrated the capacity to deploy malware against critical infrastructure to degrade [and] damage OT and IT assets.*

– National Cyber Threat Assessment 2020

– National Cyber Threat Assessment 2023-2024

## Accelerated development<sup>1</sup>

Cryptocurrency, machine learning, decryption, advanced exploits

## State-sponsorship<sup>1</sup>

“The [...] cyber programs of China, Russia, Iran, and North Korea pose the greatest strategic cyber threats to Canada”

## Target trends<sup>1</sup>

“State-sponsored actors target critical infrastructure to collect information through espionage, to pre-position in case of future hostilities”

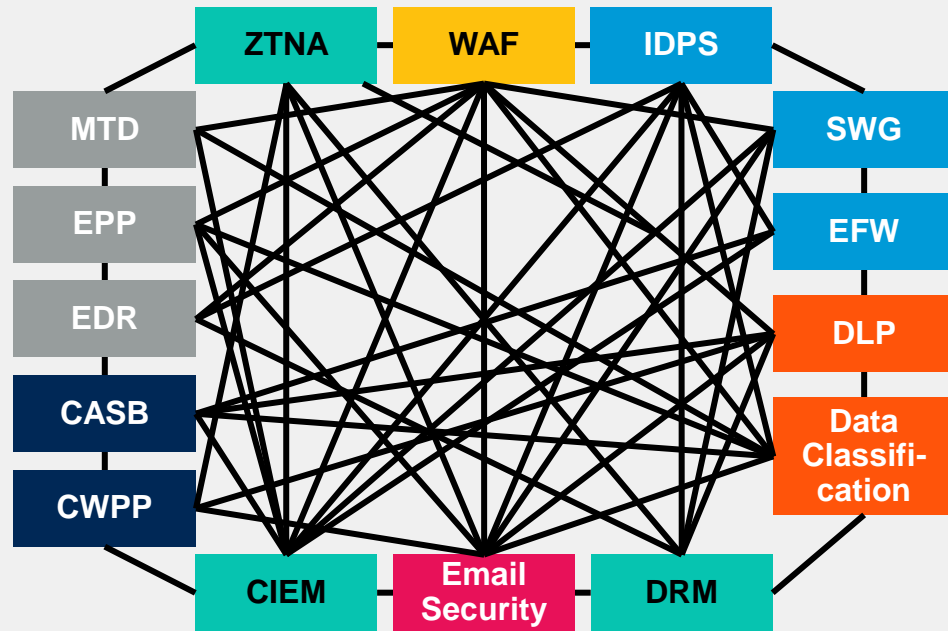

1. Canadian Center for Cyber Security (2022), *National Cyber Threat Assessment 2023-2024*

# CCSC: Identified Trends

# Cybersecurity Mesh Architecture: Wholistic Security Coverage

Gartner®

Executive Guide to Cybersecurity Mesh, 2022

Felix Gaehtgens, James Hoover, Henrique Teixeira, Claudio Neiva, Michael Kelley, Mary Ruddy, Patrick Hevesi. As of October 2021

## Secure Connectivity

Digital Transformation requires secure data sharing from OT to Data Centers and Cloud

## Secure Remote Access

Zero-trust access for authorized remote technicians and third-parties

## Converged Security Operations

Synergistically manage security across networks in a converged SOC.

## AI-powered Security Services

Enable security solutions to stay ahead of evolving threats

# Fortinet Security Fabric

## Broad

Visibility and protection of the entire digital attack surface to better manage risk

## Integrated

Solution that reduces management complexity and shares threat intelligence

## Automated

Self-healing networks with AI-driven security for fast and efficient operations

# Bill C-26

*An Act respecting cyber security, amending the Telecommunications Act and making consequential amendments to other Acts*

# Bill C-26

- Introduced June 14, 2022
- Currently in consideration by the Committee on Public Safety and National Security
- “To [enhance] the security and resilience of the critical cyber systems of the [...] private sector”
- Read it yourself: [Bill C-26 - Parliament of Canada](#)

Image: DALL-E (2023), cybersecurity legislation for critical infrastructure, pixel art

# Bill C-26: A bill in two parts

## Part 1: Telecommunications Act

- Amendments to the existing Telecommunications Act
- TI;dr: the Federal Cabinet can require a telco to do or not do something (broadly)
- Financial penalties up to \$15,000,000 per day

## Part 2: Critical Cyber Systems Protection Act

- A new Act for critical operators
- TI;dr: implement a cyber security program and do or not do something (broadly) as defined by the regulator
- Financial penalties up to \$15,000,000 per day

# Part 1

Amendments to the Telecommunications Act

# Why? Huawei

The image shows a screenshot of a news article from CBC News. The article is titled "Canada bans Chinese tech giant Huawei from 5G network" and is categorized under "Politics". The author is Catharine Tunney and Richard Raycraft. The article was posted on May 19, 2022, at 1:50 PM MDT and last updated on May 19, 2022. The article is by Adrian Morrow, a U.S. Correspondent based in Ottawa, Toronto, London, and Washington. It was published on July 14, 2020, and updated on July 15, 2020. The article's sub-headline is "Decision comes loaded with implications for national security and diplomacy". The article is written in a professional, journalistic style. The screenshot also shows a portion of a CNET article on the left and a sidebar on the right with navigation links for Politics, Sports, Life, and Arts.

# Security of Canadian telecommunications system

**15.1 (1)** If, in the opinion of the Governor in Council, it is necessary to do so to secure the Canadian telecommunications system, including against the threat of interference, manipulation or disruption, the Governor in Council may, by order,

**(a) prohibit a telecommunications service provider from using all products and services provided by a specified person** in, or in relation to, its telecommunications network or telecommunications facilities, or any part of those networks or facilities; or

**(b) direct a telecommunications service provider to remove all products provided by a specified person** from its telecommunications networks or telecommunications facilities, or any part of those networks or facilities.

AKA the  
Federal Cabinet

Prohibit the  
future purchase  
or use of a  
product, service,  
or provider

Require the  
removal of an  
existing product,  
service, or  
provider

# Security of Canadian telecommunications system

**15.2 (1)** If, in the Minister's opinion, it is necessary to do so to secure the Canadian telecommunications system, including against the threat of interference, manipulation or disruption, the Minister may, by order and after consultation with the Minister of Public Safety and Emergency Preparedness,

**(a) prohibit a telecommunications service provider from providing any** service to any specified person, including a telecommunications service provider; and

**(b) direct a telecommunications service provider to suspend providing for a specified period any service** to any specified person, including a telecommunications service provider.

AKA the  
Minister of  
Industry

Prohibit  
delivering a  
service to any  
party

Require the  
suspension of  
service to any  
party for a fixed  
period

# Orders from the Minister of Industry

**15.2 (2)** The Minister may, by order, **direct a telecommunications service provider to do anything or refrain from doing anything** — other than a thing specified in subsection (1) or 15.1(1) — that is specified in the order and that is, in the Minister's opinion, necessary to secure the Canadian telecommunications system, including against the threat of interference, manipulation or disruption.

AKA the  
Minister of  
Industry

# What can be ordered?

**(c) impose conditions on a telecommunications service provider's use of any product or service**, or any product or service provided by a specified person, including a telecommunications service provider;

Constrain use of a product or service

**(d) impose conditions on a telecommunications service provider's provision of services** to a specified person, including a telecommunications service provider;

Constrain service delivery

**(e) prohibit a telecommunications service provider from entering into a service agreement** for any product or service used in, or in relation to, its telecommunications network or telecommunications facilities, or any part of those networks or facilities;

Prohibit or terminate service agreements

**(f) require that a telecommunications service provider terminate a service agreement** referred to in paragraph (e);

# What can be ordered?

(g) prohibit a telecommunications service provider from upgrading any specified product or service;

(h) require that a telecommunications service provider's telecommunications **networks** or telecommunications **facilities** as well as its **procurement plans** for those networks or facilities, be **subject to specified review processes**;

(i) require that a telecommunications service provider **develop a security plan** in relation to its telecommunications services, telecommunications networks or telecommunications facilities;

(j) require that assessments be conducted to **identify any vulnerability** in a telecommunications service provider's telecommunications services, telecommunications networks or telecommunications facilities or its security plan referred to in paragraph (i);

Prohibit an upgrade

Require review

Require security planning

Identify vulnerabilities (beyond CVEs!)

# What can be ordered?

(k) require that a telecommunications service provider take steps to **mitigate any vulnerability** in its telecommunications services, telecommunications networks or telecommunications facilities or its security plan referred to in paragraph (i); or

(l) require that a telecommunications service provider **implement specified standards** in relation to its telecommunications services, telecommunications networks or telecommunications facilities.

Vulnerability mitigation (beyond CVEs!)

Implement standards

“among other things”

# Exchange of information

15.6 Despite section 15.5, to the extent that is necessary for any purpose related to the making, amending or revoking of an order under section 15.1 or 15.2 or a regulation under paragraph 15.8(1)(a) — or to verifying compliance or preventing non-compliance with such an order or regulation — **the following persons and entities may collect information from and disclose information to each other, including confidential information:**

- (a) the Minister;
- (b) the Minister of Public Safety and Emergency Preparedness;
- (c) the Minister of Foreign Affairs;
- (d) the Minister of National Defence;
- (e) the Chief of the Defence Staff;
- (f) the Chief or an employee of the Communications Security Establishment;
- (g) the Director or an employee of the Canadian Security Intelligence Service;
- (h) the Chairperson or an employee of the Commission;
- (i) a person designated under section 15.4; and
- (j) any other prescribed person or entity.

Collect and share confidential info

Whoever is designated

# Administrative Monetary Penalties (72.131)

(a) in the case of an **individual**, not exceeding **\$25,000** and, for a subsequent contravention, not exceeding **\$50,000**; or

Individuals

(b) in any other case, not exceeding **\$10,000,000** and, for a subsequent contravention, not exceeding **\$15,000,000**.

Businesses

## Continuing violation

**72.132** A violation that is continued on more than one day **constitutes a separate violation** in respect of each day during which it is continued.

Per day

73.3.1-3: Individuals include officers, directors, agents, mandataries, employees, contractors

# Part 1: Summary

The Federal Cabinet or Minister of Industry can direct a Telecommunications provider (or their officers, directors, agents, mandataries, employees, contractors) to:

- Use or not use a product or service
- Modify or not provide a service
- Identify and mitigate vulnerabilities and cyber security risks
- Implement specific standards
- Report incidents
- Share confidential information with any designate
- Pay a monetary penalty per violation (up to \$50,000 for individuals, \$15,000,000 for companies – per day)

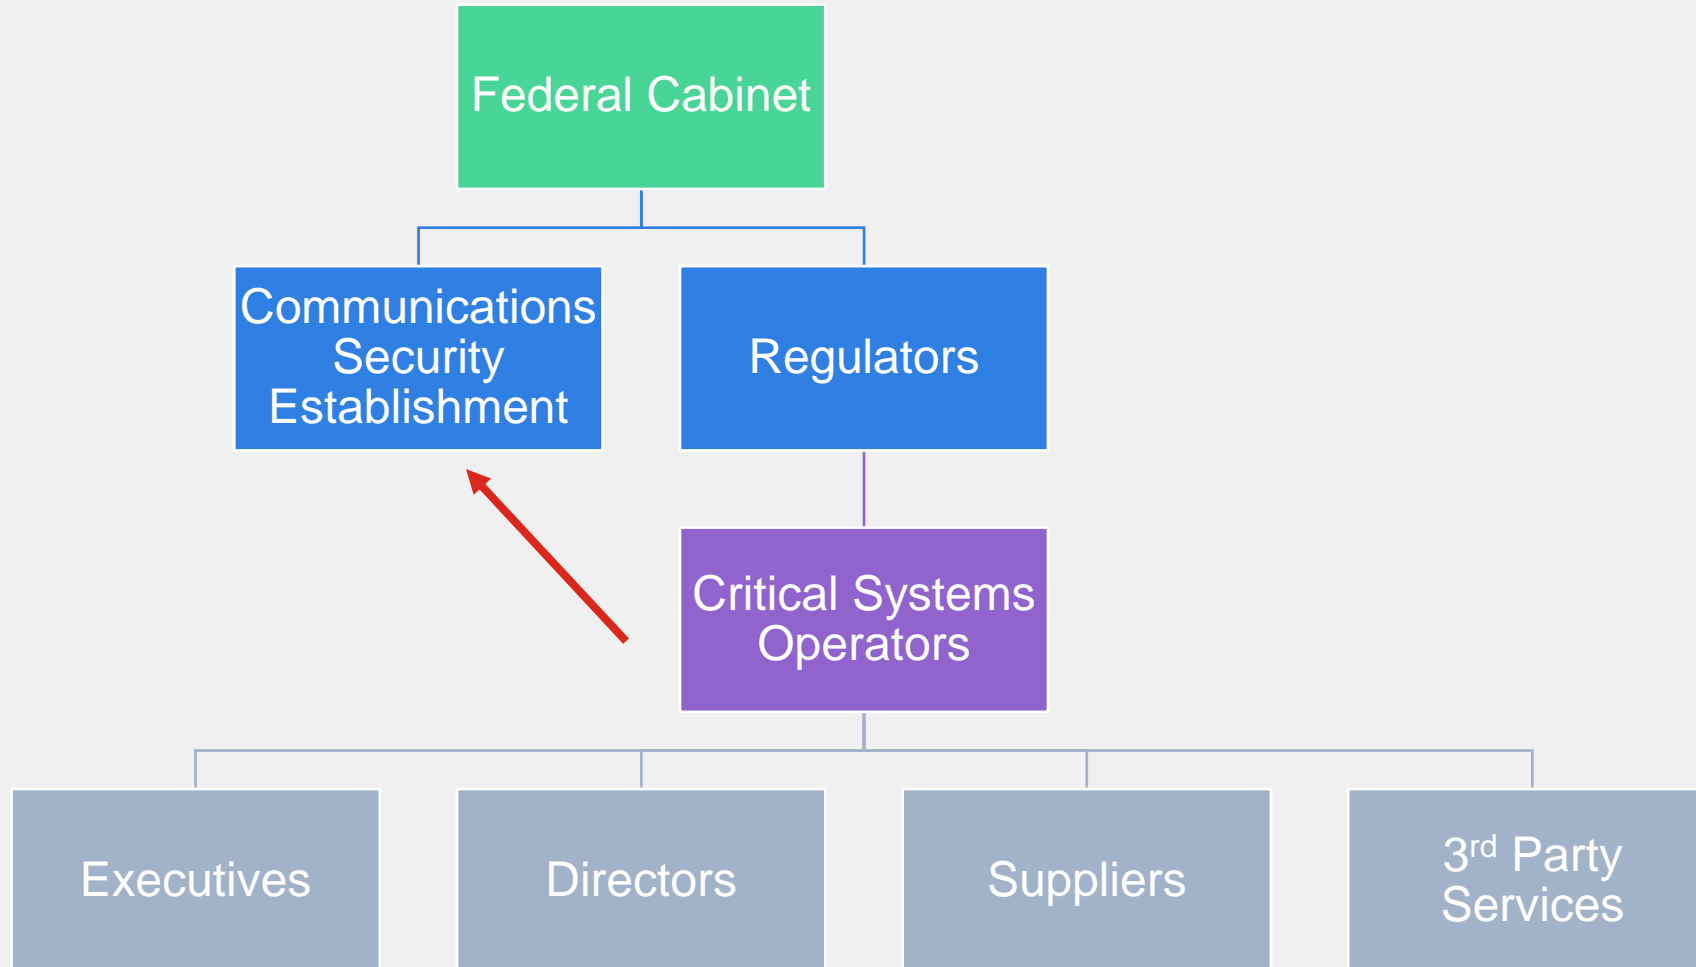

# Part 2

## Critical Cyber Systems Protection Act

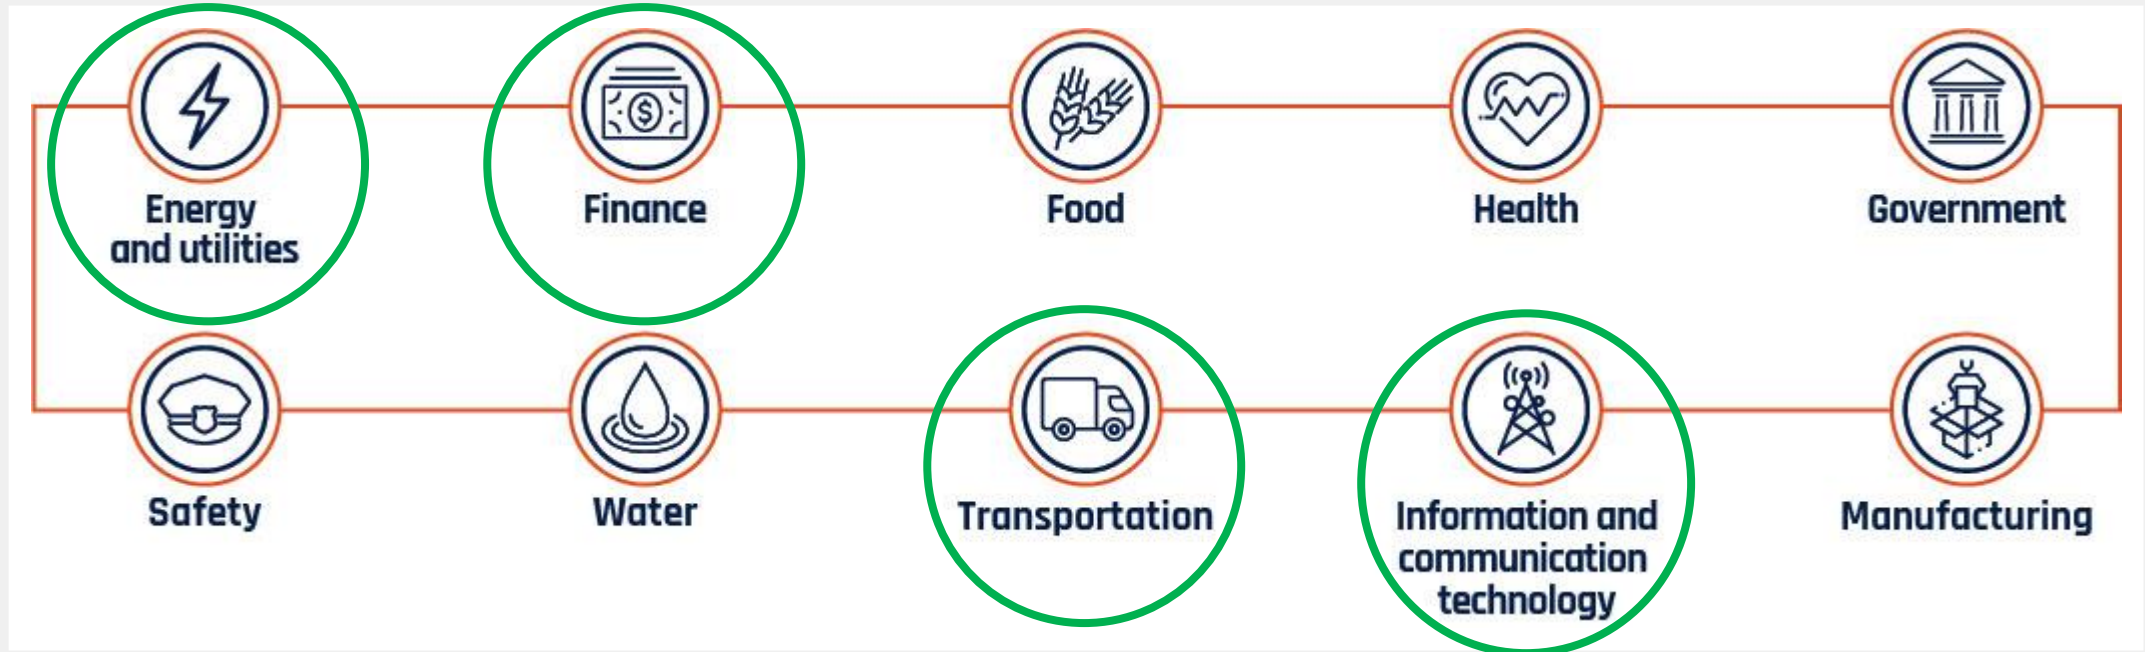

# Critical Cyber Systems Protection Act

# CCSC/CSE – Critical Infrastructure Sectors

# Schedule 1: Vital Services and Vital Systems

<b>Vital Services and Vital Systems</b>	<b>Regulator</b>
Telecommunications services	Minister of Industry
Interprovincial or international pipeline and power line systems	Canadian Energy Regulator
Nuclear energy systems	Canadian Nuclear Safety Commission
Transportation Systems that are within the legislative authority of Parliament	Minister of Transport
Banking systems	Office of the Superintendent of Financial Institutions
Clearing and settlement systems	Bank of Canada

# Obligations of the Designated Operators of Critical Cyber Systems

**8** A designated operator that owns, controls or operates a critical cyber system **must comply with the requirements of this Act** and the regulations with respect to that critical cyber system.

1. **Establish a cyber security program** within 90-days
2. Provide the program to the appropriate regulator
3. Implement and maintain the program
4. Review the program at least annually
5. **Mitigate supply-chain and third-party risks**
6. **Immediately report cyber security incidents**
7. Comply with any direction from the Federal Cabinet
8. Submit to inspection

Report to the Communications Security Establishment (CSE), then notify the appropriate regulator

# Establish a Cyber Security Program

**9 (1)** After an order that is made under section 7 is published in the *Canada Gazette*, Part II, a designated operator that belongs to a class of operators set out in Schedule 2 **must, within 90 days** after the day on which the designated operator becomes a member of that class, establish a cyber security program in respect of its critical cyber systems and include in the program reasonable steps to, in accordance with any regulations,

**(a)** identify and manage any organizational cyber security risks, **including risks associated with the designated operator's supply chain** and its use of **third-party products and services**;

**(b)** **protect** its critical cyber systems from being compromised;

**(c)** **detect** any cyber security incidents affecting, or having the potential to affect, its critical cyber systems;

**(d)** **minimize the impact** of cyber security incidents affecting critical cyber systems; and

**(e)** do anything that is prescribed by the regulations.

- Vulnerabilities
- CVEs
- Credential exposure
- Insecure perimeter
- MFA
- Phishing
- Incident Response
- SOC / NOC
- Risk assessment
- Pentesting
- EDR
- Ingress / egress profiling
- Trust boundaries
- Microsegmentation

# Mitigation of Supply-chain and Third-party Risks

**15** As soon as **any cyber security risk** associated with the designated operator's **supply chain** or its use of **third-party products and services** has been identified under paragraph 9(1)(a), **the designated operator must take reasonable steps**, including any steps that are prescribed by the regulations, **to mitigate those risks**.

## 14.1.b: Regulator must be notified of any changes

Examples of supply-chain & third-party products and services:

- Contractors
- Equipment
- PaaS
- Resellers
- SaaS
- Service providers / MSSP
- Suppliers

# Regulating Planning, Auditing & Reporting

**135** The Governor in Council may make regulations for carrying out the purposes and provisions of this Act, including regulations

AKA the  
Federal Cabinet

- (a) respecting **cyber security programs**;
- (b) respecting any condition and criteria respecting **internal audits**;
- (c) respecting **the form and manner for reporting** any cyber security incidents referred to in section 17 and the types of incidents that must be reported;
- (d) respecting **the management of records** referred to in section 30, including the collection, use, retention, disclosure and disposal of those records;
- (e) designating any provision of this Act or of the regulations made under this Act for the purposes of section 90;
- (f) **classifying each violation** as a minor violation, a serious violation or a very serious violation;
- (g) fixing the maximum penalty in respect of each violation;
- (h) defining, for the purposes of this Act, any word or expression that is used in this Act but is not defined; and
- (i) prescribing anything that is to be prescribed under this Act.

# Administrative Monetary Penalties

## Penalty

**91** The amount that may be fixed under any regulations made under paragraph 135(g) as the penalty for a violation must not be more than

- (a) **\$1,000,000, in the case of an individual;** and
- (b) **\$15,000,000, in any other case.**

## Continuing violation

**94** A violation that is committed or continued on more than one day **constitutes a separate violation** in respect of each day on which it is committed or continued.

Per day

**93: Individuals include any director or officer of the designated operator**

# Part 2: Summary

The Federal Cabinet or Minister of Industry can direct a critical systems operator (or their officers, directors, agents, mandataries, employees, contractors) to:

- Do or not do anything
- Implement a cybersecurity program
- Identify and mitigate vulnerabilities and cyber security risks, including those stemming from 3<sup>rd</sup> parties and supply-chains
- Report incidents to the CSE
- Report on changes to the cybersecurity program, including any risks or vulnerabilities identified, and steps taken to mitigate the same, to the appropriate regulator
- Share confidential information with any designate
- Pay a monetary penalty of up to \$15 million per violation, per day

# Critical Cyber Systems Protection Act

## Principal Requirements

**Reputable Vendors / Services / Suppliers**

**Cybersecurity Plan**

**Mitigate 3<sup>rd</sup> Party & Supply Chain Risk**

**Protection, Monitoring, Detection, and Response**

**Reporting, Audit, and Assessment**

# Security Operations

Some Fundamentals

# The Current Approach to Detection & Containment is Inadequate

**197 days**

Average time to identify a breach<sup>1</sup>

**70 days**

Average time to recover from a breach<sup>1</sup>

**15 minutes**

On average until cybercriminals begin automated scanning & exploitation of new CVEs<sup>2</sup>

**<5 hours**

Time from initial access to domain compromise for more than 60% of hackers<sup>3</sup>

**<5 days**

Dwell time before ransomware deployment<sup>4</sup>

1. <https://techjury.net/blog/data-breach-statistics/>

2. <https://www.acronis.com/en-us/cyber-protection-center/posts/report-attackers-scan-for-vulnerabilities-within-15-minutes-of-cve-disclosure/>

3. <https://www.computerweekly.com/news/252525373/Most-hackers-exfiltrate-data-within-five-hours-of-gaining-access>

4. <https://www.bleepingcomputer.com/news/security/ransomware-hackers-dwell-time-drops-to-5-days-rdp-still-widely-used/>

# Shortcomings in Incident Response

*Conventional incident response methods fail to mitigate the risk posed by APTs because they make two flawed assumptions: **response should happen after the point of compromise, and the compromise was the result of a fixable flaw.***

– Lockheed Martin Corporation

# Becoming Adequate: Knowing about knowing

## Known Knowns

- Conceivable and measured
- Identified vulnerabilities
- Admin accounts
- Plans and procedures
- Detected compromise

## Known Unknowns

- Conceivable and **not** measured
- Unidentified, known vulnerabilities
- Compromised credentials
- Misconfigurations
- Third-party risk
- “Assume the breach”

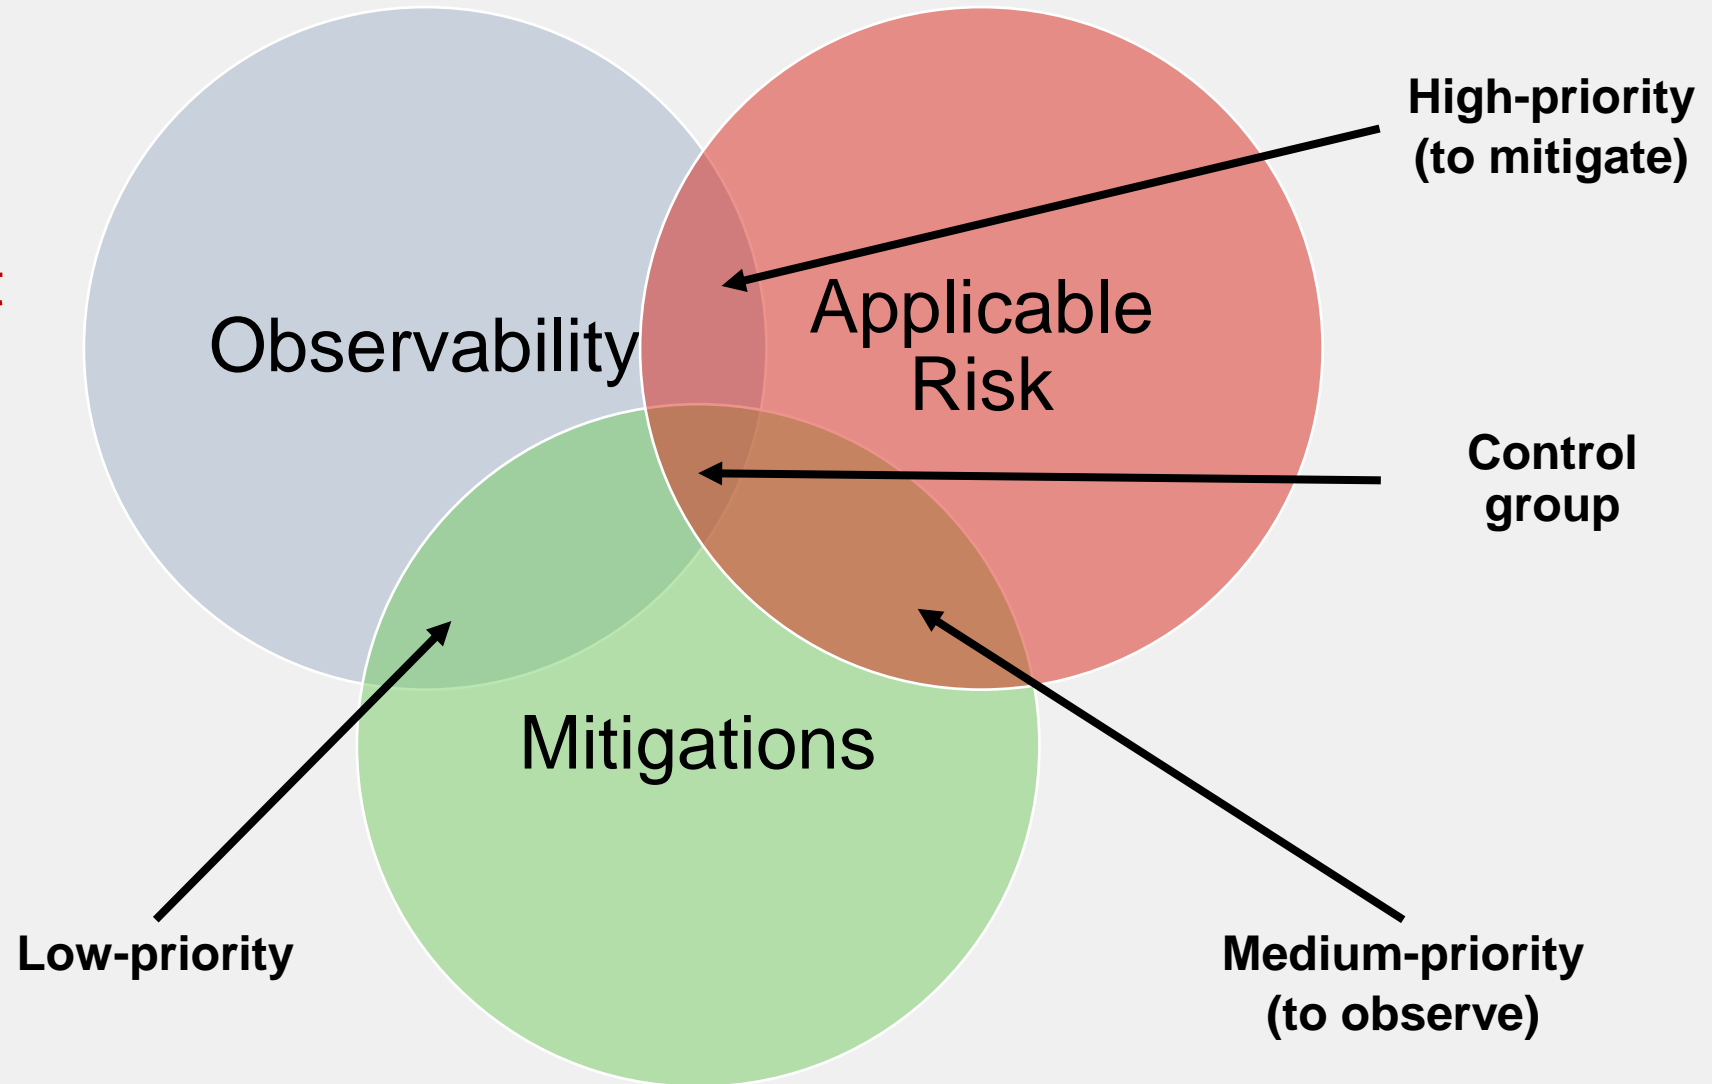

## Unknown Unknowns

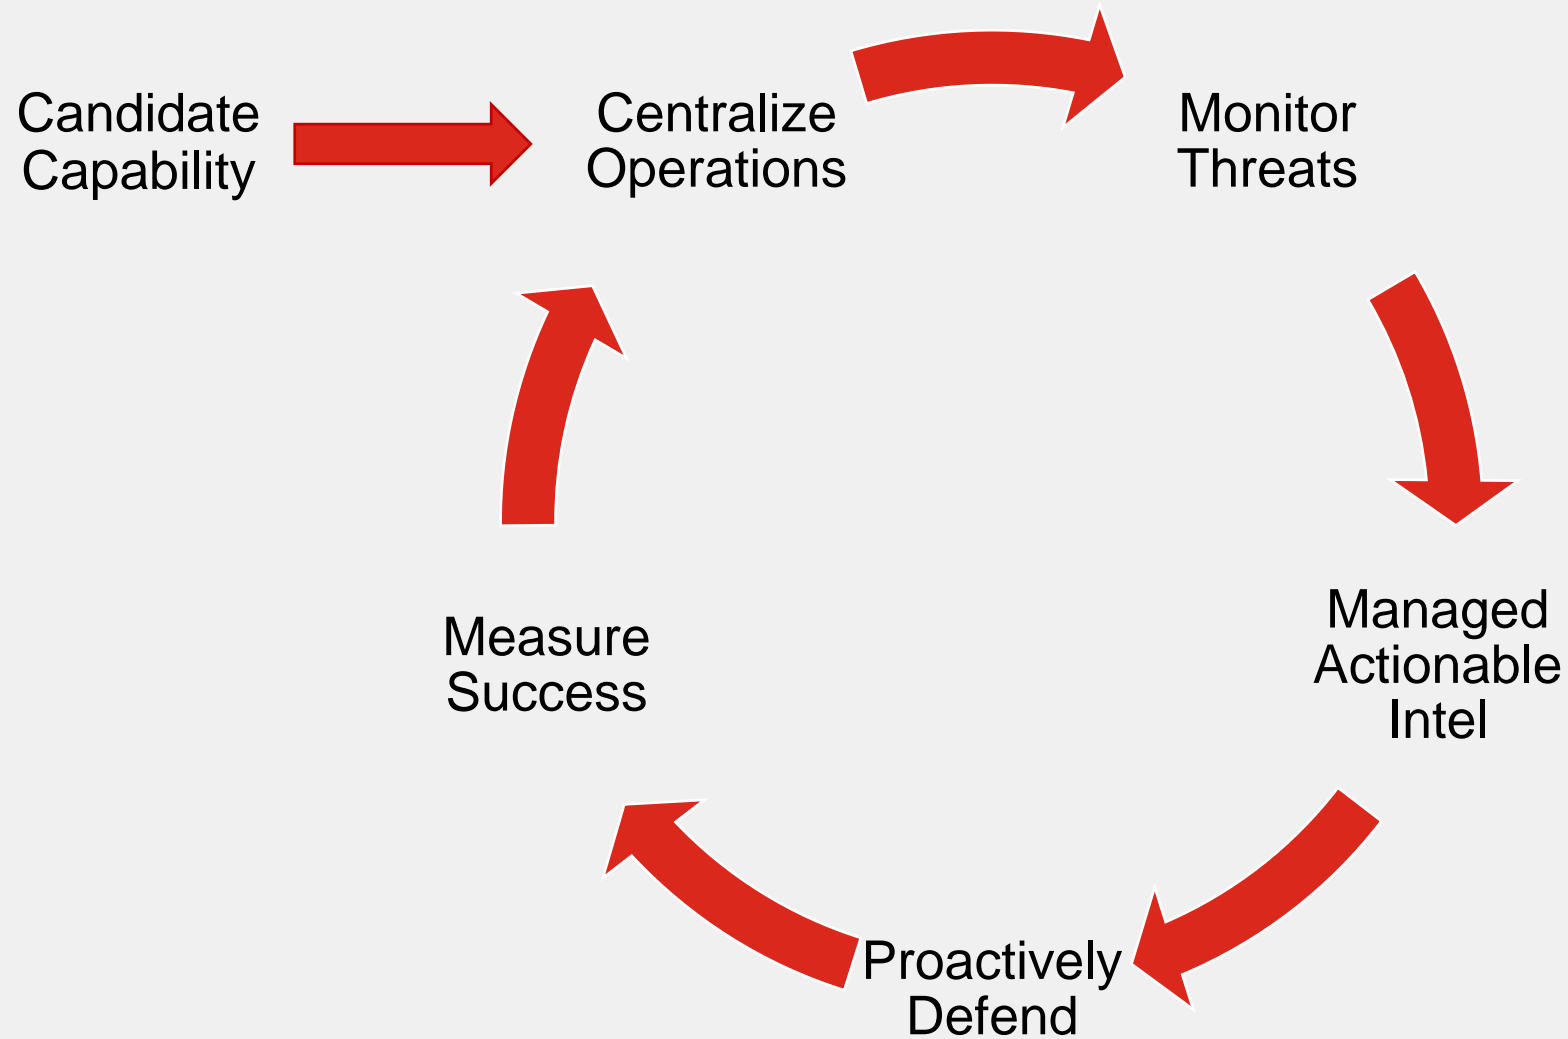

- Inconceivable and unmeasured
- Zero-days
- Unaccounted risk
- Undetected, unaccounted for compromise

# Identifying Observability & Mitigation Gaps

Measure coverage against MITRE ATT&CK!

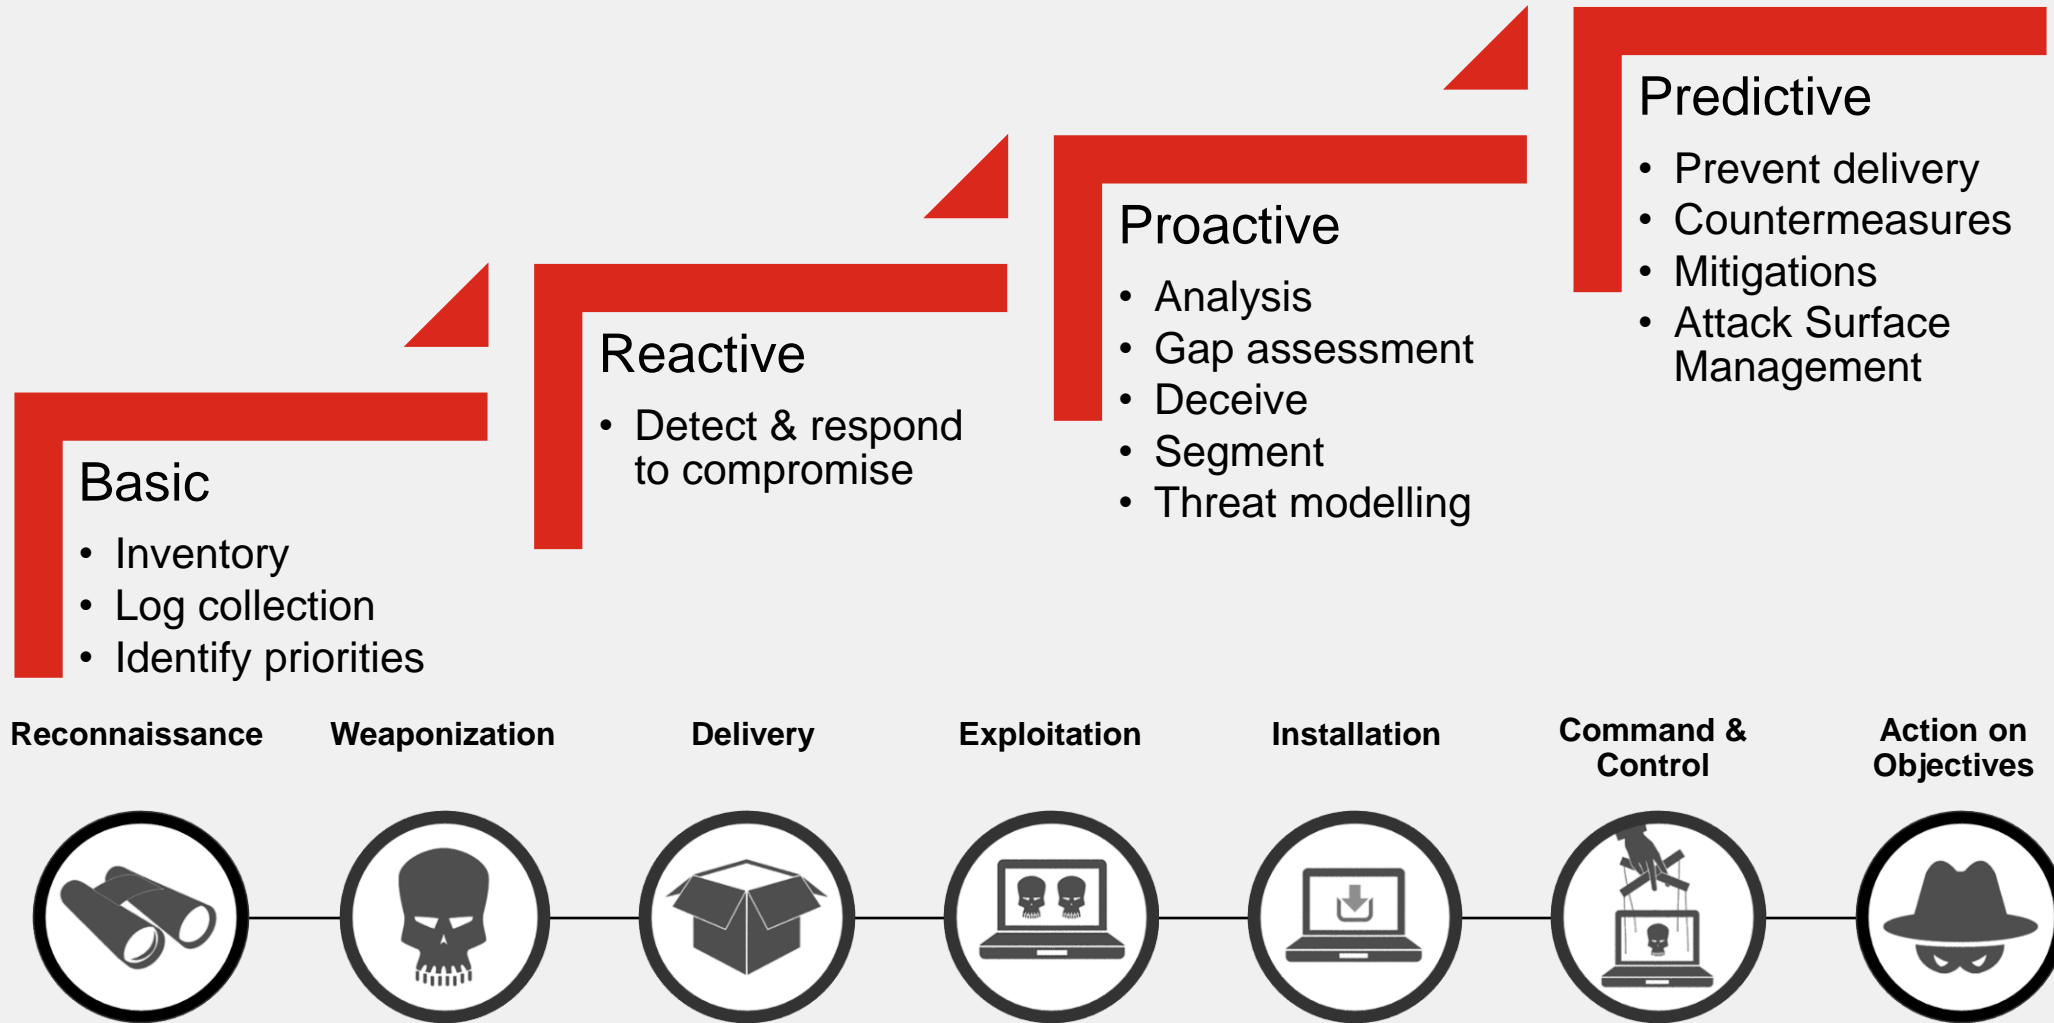

# Iteratively Improving Security Operations...

# ... to Increase Security Operations Maturity

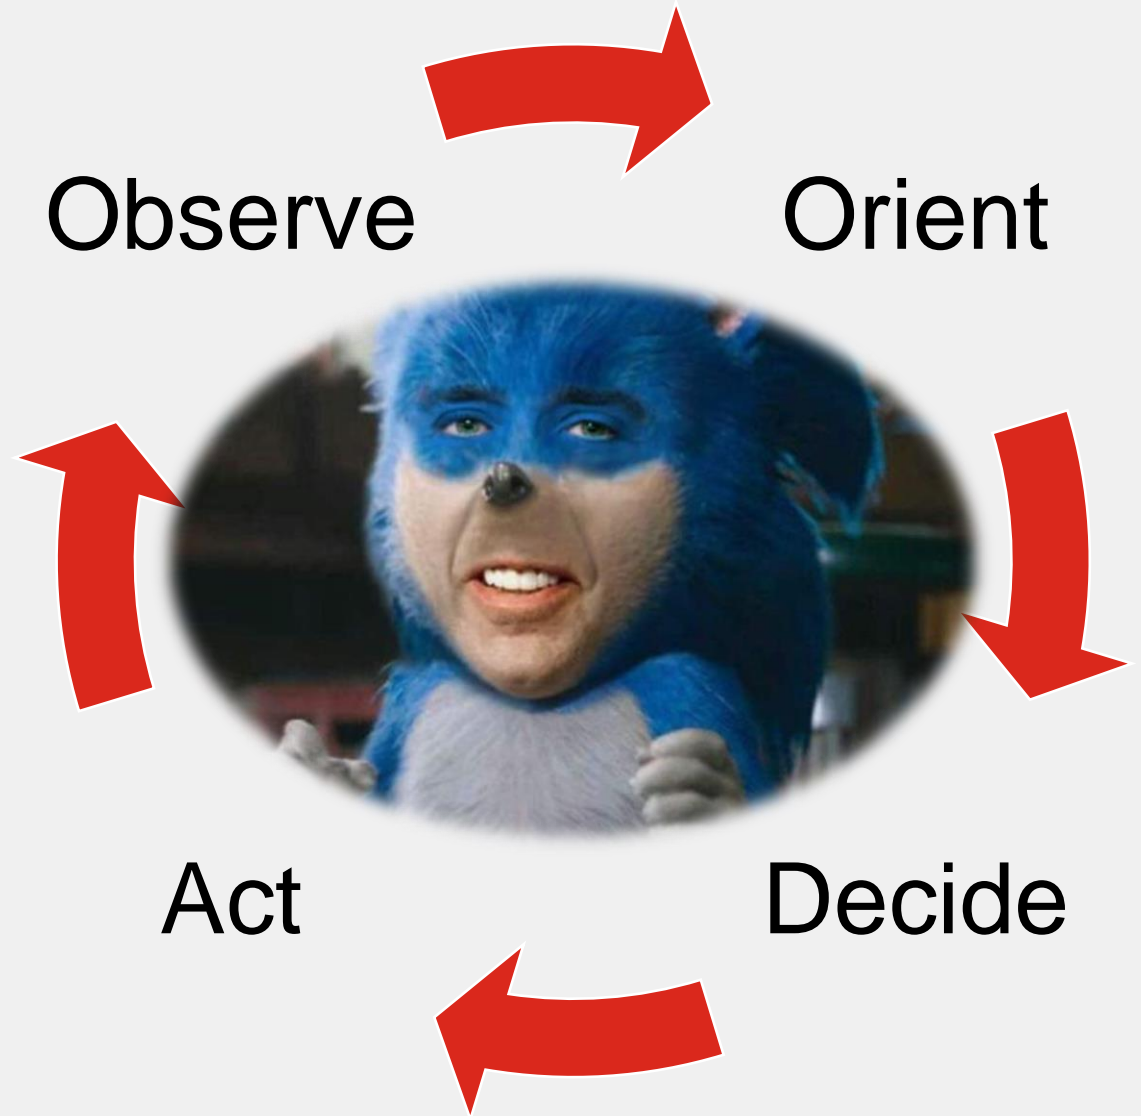

# Or Simply: Respond to Threats Faster

*In order for an intrusion to be economical, adversaries must re-use tools and infrastructure.*

*Defenders must be able to move their detection and analysis up the kill chain and more importantly to implement [mitigations] across the kill chain.*

*In this way, the defender increases the adversary's cost of executing successful intrusions.*

– Lockheed Martin Corporation
